

Common Core Math in 3rd Grade

Back in the good old days, third grade math was all about multiplication. In the Common Core, that's what it is still about!

A key change is that now we want students to apply their multiplication skills to more story problems, as well as connect the multiplication facts to one another. For ex

!

Eureka Math Module 1 Lesson 7 (excerpt)

1. a. Count by 2 six times.

b. Draw an array that matches your count-by.

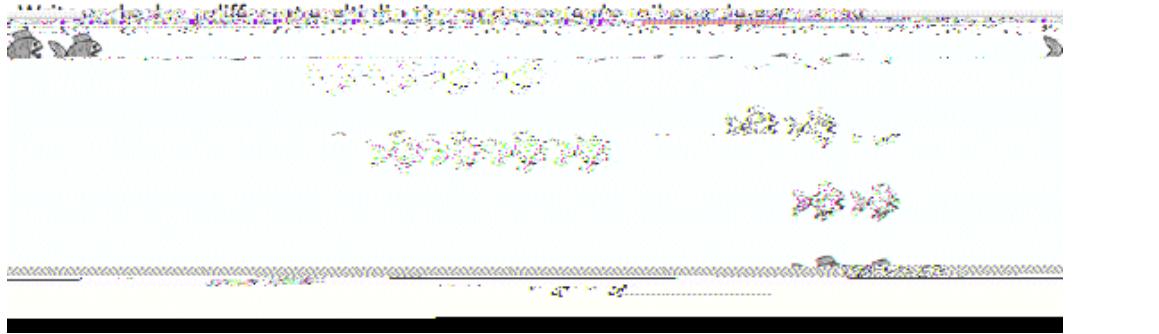

2. a. Count by 6 two times.

b. Draw an array that matches your count-by.

$2 \times 3 = 6$

$6 \times 2 = 12$
